AG Skin Solutions Product Line

AG Skin Solutions - Active Serum

Product ID: 25300

A&G Active Serum is an anti-aging skin serum formulated with patent-pending technology for the delivery of key growth factors found in natural human skin. These natural human growth factors include TGF-b(1-3) [Transforming growth factor beta], PDGF [Platelet derived from growth factor], GM-CSF [Granulocyte-macrophage colony-stimulating factor], and Interleukins (IL3, IL6-8). As we age, the production of these growth factors within the skin is reduced, and leads to wrinkling and thinning of the skin. By re-introducing these factors through daily application of A&G Active Serum, damaged skin cells are repaired, and skin tissue regenerated. The visible results from A&G Active Serum are that the appearance of fine lines and wrinkles will be diminished and smoother, more luminous skin will result. As the effects of A&G Active Serum work through your own natural processes of renewing the skin, visible results will occur through your own natural processes of skin renewal, and will be noticed in as soon as three days. Moderate skin renewal may occur within two weeks, but optimal improvement to your skin is generally not reached until after one month of daily use. Patients from an ongoing clinical study had the following results after only four weeks of use with A&G Active Serum:

94% of the women saw improvement in overall appearance of skin.

85% experienced improvement in skin texture/smoothness.

79% felt an increase in skin firmness and elasticity.

87% saw a reduction in the appearance of fine lines and wrinkles.

Retail Price: \$199.00

Usage:

After cleansing, dispense a small quantity onto clean finger and gently apply over the entire face, neck, and chest areas. Moderate skin renewal may occur within 2 weeks, but optimal improvement to your skin is generally not reached until after 6 weeks of daily use.

AG Skin Solutions - Eye Serum

Product ID: 25302

Designed to help reduce dark circles under the eyes, enhance the repair of skin tissue and help diminish the appearance of fine lines and wrinkles under and around the eye area.

Retail Price: \$120.00

Usage:

After cleansing the skin, dispense a small quantity of Eye Solution onto a clean finger and, with gentle pressure, move your finger in a circular motion around the eye area until the serum is absorbed. For optimum results apply the eye solution twice daily, preferably mornings and evenings.

AG Skin Solutions - Recovery Serum

Product ID: 25301

Designed to improve the appearance and help relieve irritations from bruising of the skin following cosmetic surgery, improve the repair of broken capillaries, and greatly reduce red appearance of skin associated with rosacea and reduces the post-procedural discomfort associated with chemical peel and skin trauma.

Retail Price: \$250.00

Usage:

Apply a thin layer of serum gently to cover the entire affected area. For optimum results apply A&G Recovery serum once every 16 hours following the first application.
